About The Company

Poojitha Technologies is a rapidly growing Information Technology firm located in Hyderabad, India with a motto of providing end to end IT Solutions / Services / Products under one roof. We are backed up with different teams working at different locations of the world with an extensive commitment, superior technical know-how, dedication and an urge to create a difference. All have a common belief that "Team Work can achieve every thing".

Quality is very important to us. We give more value to quality than other factors that influence the project. We deliver quality work while effectively managing the diverse group of people and their expectations with well-structured quality management systems in place. It defines standards, methodologies and processes for all our services and deliverables to migrate risk and unpredictability across all stages of the process. At the same time we our QMS have built in flexibility to adapt the quality processes of our customer organizations. Our processes undergo regular review and improvements based on our practical experiences.

We always keep in mind the words of our beloved Babuji who said, "Customer is most important part of our business". We give importance to customer satisfaction.

We specialize in the development of custom software applications for Internet, Intranet, desktop and mobile devices and smart phones. We have well experienced team for customization of open source products like Joomla, Virtuemart, Alfresco, etc., as well as commercial products like SharePoint, Navision, MSCRM, etc., for your enterprise. We also have well experienced team who can give consultancy services in the field of Application Architecture, Project Management, System Integration, etc. We have different solutions for different customers depending on its size and requirements.

Our Vision

To excel in IT Realm maximizing the trust of clients with our technical capabilities, professional working and serving them with smart and industry best products and services thus gaining the place in worlds' top 100 IT companies list by 2020.

Our Mission

To achieve global success by earning trust by delivering customer satisfaction and to build good relationship with our customers, at the same time by ensuring 100% employee satisfaction to each and every team member thus being the part of everyone's success.

We understand IT.

We get IT Right.

We get IT right the First Time.

Our Methodologies

- Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.
- Welcome changing requirements, even late in development
- Agile processes harness change for the customer's competitive advantage.
- Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.
- Business people and developers must work together daily throughout the project.
- Build projects around motivated individuals.
- Give them the environment and support they need, and trust them to get the job done
- The most efficient & effective method of conveying information to and within a development team is face-to-face conversation.
- Working software is the primary measure of progress.
- Agile processes promote sustainable development.
- The sponsors, developers, and users should be able to maintain a constant pace indefinitely
- Continuous attention to technical excellence and good design enhances agility
- Simplicity--the art of maximizing the amount of work not done--is essential.
- The best architectures, requirements, and designs emerge from self-organizing teams.
- At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly.
